

Seikyu 請求

Sell an invoice today, or invest in one.
Every invoice is an ENS name that expires on its
due date.

Live on Sepolia · **seikyu.xyz**

THE PROBLEM

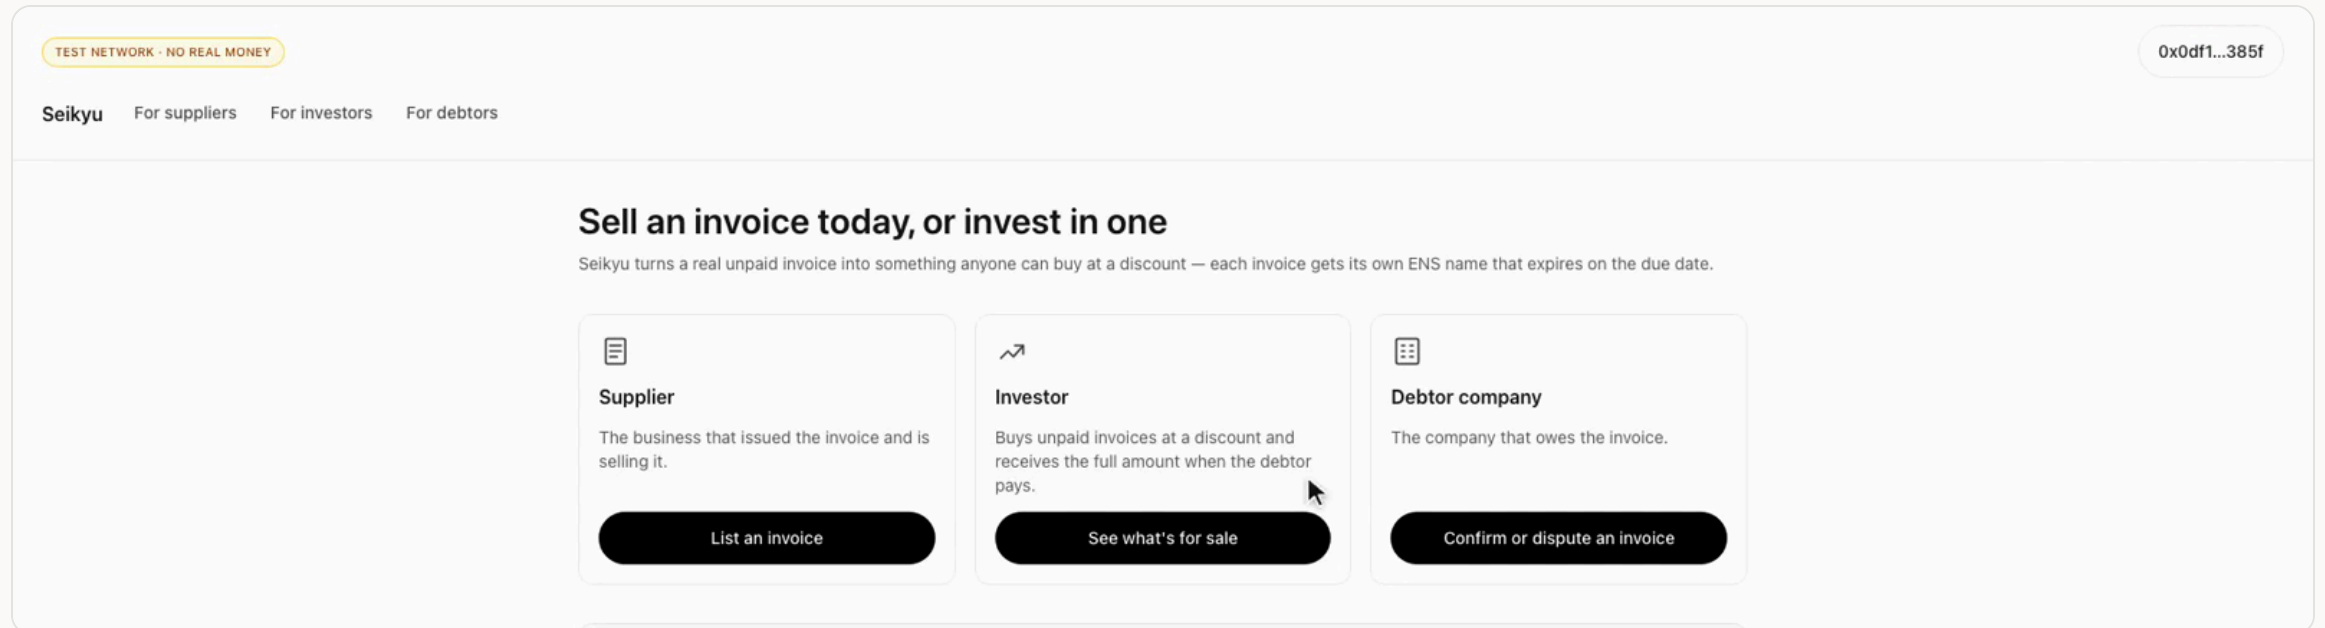

**A supplier delivers today
and gets paid in 60 to 90 days.**

Until the debtor pays, that invoice is real money the supplier cannot touch — and nobody else can buy it, because nobody can check whether it is genuine.

WHAT SEIKYU DOES

Three people, one invoice

- **Supplier** lists an unpaid invoice · **Investor** buys it at a discount, paying the supplier now · **Debtor company** pays the full amount on the due date

STEP 1 — ISSUE

One signature turns an invoice into an asset

- Mints an ERC-721 receivable
- Deploys a resolver for this invoice alone
- Registers `inv-15.seikyu.eth` with **expiry = the due date**

List an invoice for sale

Fill in who owes you and how much. Seikyu creates the invoice's ENS name and puts it up for sale at your discount. Investors are paid the full amount by the debtor on the due date.

Debtor address (Debtor company)

0xb6359D76E104a9fF007c979d5b18b2804578E72B

Debtor accounts-payable address (Debtor's accountant)

0xe1D7a414963005BdCeecA0da42a50A3FFF7d9aDe

The wallet that may confirm or dispute this invoice on the debtor's behalf.

Face value (test USDC)

1000

Discount %

5

Investor pays 950 test USDC now for 1,000 test USDC at maturity.

Due date

☒ +7 days ☐ +30 days ☐ +10 minutes (quick demo) ☐ Custom

Registers `inv-15.seikyu.eth` with expiry = Oct 4, 2026, 12:53 AM

Issue invoice

STEP 1 — ISSUE

The invoice *is* the ENS name

- Eight text records: amount, debtor, due date, status, issuer...
- Anyone can read it — no Seikyu account needed
- The name lives exactly as long as the debt is current

1,000 test USDC

Due
Oct 4, 2026, 00:53 JST — due in 6 days

Debtor company

STEP 2 — BUY

Only a real person can buy

- World ID proves the buyer is one unique human
- The proof is bound to their wallet, server-side
- One human, one investor wallet — capped at 3 open invoices

STEP 2 — BUY

950 now, instead of 1,000 later

- The supplier is paid the moment the sale clears
- The ENS status record flips to **funded**

inv-15.seikyu.eth

Invoice ID — an ENS name that stops resolving when the invoice is paid, withdrawn, or expires.

Step 2 of 2 — pay 950 test USDC to the supplier now; you'll receive 1,000 when the debtor pays

Buy for 950 mUSDC

► TECHNICAL DETAILS (ENS)

STEP 3 — THE DEBTOR CONFIRMS

They can confirm the debt — and change nothing else

- The debtor's accountant writes one record: `ack`
- Editing the amount reverts on-chain, by design
- A disputed invoice cannot be bought at all

You're acting for the company that owes this invoice. Confirming or disputing writes the debtor's response onto the invoice's ENS name; the supplier and investors see it immediately, and a disputed invoice can't be bought.

Connected wallet: 0xe1d7a4149630058dCeecA0da42a50A3FF7d9aDe
Only the debtor's accountant wallet named when the invoice was issued can write ack. Connect it using the button in the header.

EAC NEGATIVE DEMO — EVERY OTHER RECORD IS OUT OF REACH

☐ Send the real tx anyway (for on-chain proof)

Try to edit amount Try to edit status

amount: Blocked as designed: reverted with EACUnauthorizedAccountRoles — this wallet's EAC role is scoped to "ack" only.

STEP 4 — SETTLE

Paid in full, and the identity retires with the debt

- The investor receives the full 1,000
- The receivable token is burned
- The ENS name is unregistered — same transaction

inv-15.seikyu.eth
Invoice ID — an ENS name that stops resolving when the invoice is paid, withdrawn, or expires.
